

# 13 ARROWS

*From a distance you see a mysterious-looking house. You approach it and peek into the south window, and you see 13 arrows on the wide wall opposite the window. You step back and see another window on the west side of the house. Through it you see the same room and 13 arrows on the narrow wall opposite the window. Neither view makes much sense. Maybe you need a different point of view?*

Fold the sheet along the dashed lines so that it becomes 3 sides of a "room".
